Hiring Manager

ExxonMobil Global Trading

London, United Kingdom

Dear Hiring Manager,

I am excited to apply for the Summer Placement – Global Trading – Data & Analytics Developer position at ExxonMobil. With a strong background in data science, algorithmic trading, and software development, I am eager to contribute my analytical and problem-solving skills to your Global Trading team.

As a Lecturer at Miva Open University and Founder of Datafied Technologies, I have honed my ability to develop data-driven solutions and mentor aspiring data professionals. My expertise in Python, SQL, Power BI, and cloud computing has enabled me to design and implement predictive models, automate workflows, and optimize data pipelines. Additionally, my experience as a Data Scientist at ExploreAI Academy allowed me to apply machine learning and big data analytics to real-world problems, aligning well with ExxonMobil's focus on empowering trading teams with cutting-edge decision-making tools.

Beyond technical skills, I am deeply passionate about financial markets and commodities trading. My educational background in Applied Mathematics and Financial Engineering has provided me with the quantitative foundation necessary to navigate complex trading environments. I thrive in fast-paced, collaborative settings and am eager to leverage my analytical acumen to drive value within your team.

ExxonMobil's commitment to innovation in global energy trading aligns perfectly with my professional aspirations. I am enthusiastic about the opportunity to develop a deep understanding of the energy commodity market, enhance my knowledge of Agile software development, and contribute to the implementation of GenAI solutions.

I would welcome the opportunity to further discuss how my skills and experiences align with this role. Thank you for your time and consideration. I look forward to the possibility of contributing to ExxonMobil's success.

Best regards,

Nnamdi Augustus Isichei
